Grades 9-12

History/Social Studies

Note: The current high school graduation requirement for history/social studies reads:

“three and one-half credits of social studies, including at least one credit of United States history, one credit of geography, 0.5 credits of government and citizenship, 0.5 credits of world history, and 0.5 credits of economics”

In response to public feedback, and as a way to provide more flexibility at the local level, we have recommended to the legislative chairs of the education policy committees that consideration is given to modifying that language to read:

“three and one-half credits of social studies, encompassing at least United States history, geography, government and citizenship, world history, and economics”

Note: Should the above recommendation be accepted, schools would have more flexibility and, for example, could meet the graduation requirements with integrated courses (such as geography, economics, government and civics standards being integrated into a two-year study of U.S. History).

Note: The standards for World History are divided into two sections: World History I and World History II. School districts must teach the standards designated for World History I or World History II, or both. Students are required to master the standards in either World History I or World History II.
