

Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2014 Final Report

Date: July 03, 2018

Program or Project Title: Northern Tallgrass Prairie National Wildlife Refuge Land Acquisition , Phase 5

Funds Recommended: \$2,450,000

Manager's Name: Richard Johnson
Organization: The Nature Conservancy
Address: 1101 W. River Parkway
City: Minneapolis, 55415-1291
Office Number: 612-331-0790
Email: rich_johnson@tnc.org
Website: minnesota@tnc.org

Legislative Citation: ML 2014, Ch. 256, Art. 1, Sec. 2, Subd. 2(d)

Appropriation Language: \$2,450,000 in the second year is to the commissioner of natural resources for a contract with The Nature Conservancy in cooperation with the United States Fish and Wildlife Service to acquire land in fee or permanent conservation easements within the Northern Tallgrass Prairie Habitat Preservation Area in western Minnesota for addition to the Northern Tallgrass Prairie National Wildlife Refuge. Lands acquired with this appropriation may not be used for emergency haying and grazing in response to federal or state disaster declarations. Conservation grazing under a management plan that is already being implemented may continue. Subject to the evaluation criteria under Minnesota Rules, part 6136.0900, priority must be given to acquisition of lands that are eligible for the native prairie bank under Minnesota Statutes, section 84.96, or lands adjacent to protected native prairie. A list of proposed land acquisitions must be provided as part of the required accomplishment plan and must be consistent with the priorities in the Minnesota Prairie Conservation Plan.

County Locations: Clay, Kandiyohi, Lac qui Parle, Norman, Pipestone, Pope, and Rock.

Regions in which work was completed:

- Prairie

Activity types:

- Protect in Easement
- Protect in Fee

Priority resources addressed by activity:

- Prairie

Summary of Accomplishments:

This appropriation allowed the permanent protection of 887 acres in western Minnesota. These properties included 664 acres of remnant native prairie, 76 acres of associated wetlands complexes, and 8,500' of streamfront. For this phase we originally planned to protect 740 acres with a minimum of 375 native prairie. Both targets were exceeded - 120% of total acres and 177% of native prairie acres. The land and easements purchased with this funding by The Nature Conservancy (TNC) have been transferred to the US Fish and Wildlife Service (USFWS) and are now units of the Northern Tallgrass Prairie National Wildlife Refuge.

Process & Methods:

The Council's 25-Year Framework identifies protecting Minnesota's remaining native prairies as a critical priority. The Minnesota Prairie Conservation Plan (Prairie Plan) describes the importance of preserving the cores/corridors/complexes where there are the greatest opportunities for the long-term conservation of these prairies. The Northern Tallgrass Prairie National Wildlife Refuge Land Acquisition (NTP NWR) program shares these goals. This program is a cooperative, multi-year effort of The Nature Conservancy and the US Fish and

Wildlife Service to preserve and protect our remaining prairies and the surrounding habitat that buffers them. With Outdoor Heritage Fund support, this partnership is working together to advance these goals.

This phase included the purchase of both fee title properties and permanent habitat easements. The original targets for fee and conservation easement acquisition were 485 acres and 255 acres, respectively. Both goals were exceeded - 520 acres of fee (107% of goal) and 367 acres of easements (144% of goal).

This program's top criterion for selecting projects is the presence of remnant native prairie. As noted above, 664 acres of remnant native prairie were permanently protected. Another important goal is protecting lands in existing complexes of habitat and protected lands. All of the acquired properties were in areas identified as a priority core/complex/corridor in the Prairie Plan. We also target lands with high-quality habitat and the rare species this habitat supports. Data from the Minnesota Biological Survey confirm the conservation value of the lands conserved. 553 acres were identified as having significant biodiversity, with 272 of these ranked as having high or outstanding biodiversity. These lands support a wide-range of prairie species of concern, including Greater Prairie Chickens, Wilson's Phalaropes, Blandings's Turtles, and Regal Fritillaries. Another highlight in this phase was the protection of several rare outcrops of Sioux Quartzite and the species that depend on these outcrops.

This program also includes a relatively small restoration/enhancement component. The prioritization criteria favor parcels that are in good condition. Because of the nature of parcel ownership, however, some properties included small areas of converted or degraded lands needing grassland or wetland restoration/enhancement. This work is completed where needed to get these properties into a sustainable condition for future management. Restoration/enhancement activity with this round of funding included 149 acres of grassland site preparation/seeding or interseeding/mowing, 6 acres of tree and/or dense vegetation removal, and 98 acres of scattered vegetation removal. These acres are not reported as a separate outcome in the Output Tables in order to avoid any possible double-counting.

One thing to note when reviewing the attached Budget Spreadsheet. The Request column in the Budget and Cash Leverage Table is out of date. The figures shown are from the originally approved accomplishment plan. It does not reflect any later amendments. This discrepancy resulted from the shift from paper to online reporting during this phase. See the final version of the Accomplishment Plan, approved in January, 2017, for the final figures.

Explain Partners, Supporters, & Opposition:

This program is a cooperative effort of The Nature Conservancy and the US Fish and Wildlife Service. TNC and USFWS staff cooperate on parcel selection, working with landowners, completing due diligence requirements, and wrapping up any needed restoration/enhancement. Other agencies and NGO's are involved in this process through Landscape Technical Teams. These groups were set up to coordinate action in the priority areas identified in the Prairie Plan.

Based on feedback from local governments, TNC and USFWS instituted a new process in June, 2016 to send written notification to county governments prior to acquisition. Several of the properties in this round were acquired after this was implemented. No concerns on these projects were reported by the counties.

Additional Comments:

Exceptional challenges, expectations, failures, opportunities, or unique aspects of program

Not Listed

Other Funds Received:

- Not Listed

How were the funds used to advanced the program:

Not Listed

What is the plan to sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

Outdoor Heritage Funds were used to purchase the land in fee title or to purchase perpetual habitat easements. The land and easements purchased were transferred to the USFWS and have become units of the Northern Tallgrass Prairie National Wildlife Refuge. Long term costs for restoration, management, and wildlife/habitat/easement monitoring will be funded through USFWS operations funding.

Outcomes:

The original accomplishment plan stated the program would

Programs in prairie region:

- Expiring CRP lands are permanently protected
- Agriculture lands are converted to grasslands to sustain functioning prairie systems
- Remnant native prairies are part of large complexes of restored prairies, grasslands, and large and small wetlands
- Remnant native prairies and wetlands are perpetually protected and adequately buffered

How will the outcomes be measured and evaluated?

USFWS and TNC biologists and GIS analysts measured the following outcomes from this funding:

Total acres protected - 887 acres

Acres of native prairie - 664 acres

Other native habitat protected - 76 acres of wetlands and 8,500' of streamfront

Projects located in MN Prairie Conservation Plan core/corridor/complex - 100% (10 of 10 properties)

Acres identified by MN Biological Survey as biologically significant - 553 acres

Expiring CRP lands permanently protected - 86 acres

Budget Spreadsheet

Final Budget line item reallocations are allowed up to 10% and do not need require an amendment to the Accomplishment Plan

Total Amount: \$2,450,000

Target Lake/Stream/River Feet or Miles (original)

0

Target Lake/Stream/River Feet or Miles (final)

8,500 feet

Explain the success/shortage of acre goals:

We exceeded our total acre/fee/easement goals by 20%/7%/44% respectively. Passing our native prairie goal by 77% was also a highlight in this phase.

Parcel List

Section 1 - Restore / Enhance Parcel List

No parcels with an activity type restore or enhance.

Section 2 - Protect Parcel List

Clay

| Name | TRDS | Acres | OHF Cost | Existing Protection? | Hunting? | Fishing? | Description |
|----------------|----------|-------|-----------|----------------------|----------------|----------------|--|
| Clay County #4 | 13946202 | 80 | \$127,693 | No | Not Applicable | Not Applicable | FWS biologists classified this property as high quality native prairie. This property also adjoins an existing FWS WPA and adds to the 9,700 acres already protected in the Bluestem Prairie Core. |

Kandiyohi

| Name | TRDS | Acres | OHF Cost | Existing Protection? | Hunting? | Fishing? | Description |
|---------------------|----------|-------|-----------|----------------------|----------------|----------------|--|
| Kandiyohi County #2 | 12236210 | 153 | \$442,263 | No | Not Applicable | Not Applicable | 23 acres of native prairie, 85 acres of additional grasslands, and 23 acres of wetlands. Located in a MN Prairie Plan core. Adjoins WPA. 3,500 acres of additional protected land within 2 miles. Contiguous with Kandiyohi County #3. |

Lac qui Parle

| Name | TRDS | Acres | OHF Cost | Existing Protection? | Hunting? | Fishing? | Description |
|------------------|----------|-------|-----------|----------------------|----------|----------|---|
| Lac qui Parle #1 | 11742201 | 47 | \$63,968 | No | No | No | 38 acres of native grassland and 3,500 of streamfront on Tenmile Creek. Adjoining property to N has native prairie rated as Outstanding by MN BS. |
| Lac qui Parle #2 | 11746213 | 219 | \$444,819 | No | No | No | 185.4 acres of native grassland, 16.3 acres of wetlands, and 3,550 feet of streamfront on perennial stream. 1,474 acres of protected lands within 2 miles. Located in Antelope Hills Prairie Plan core. Several occurrences of significant species. |

Norman

| Name | TRDS | Acres | OHF Cost | Existing Protection? | Hunting? | Fishing? | Description |
|------------------|----------|-------|-----------|----------------------|----------------|----------------|---|
| Norman County #5 | 14445228 | 145 | \$208,176 | No | Not Applicable | Not Applicable | Almost the entire parcel is native grass ranked as high-quality native prairie by MN BS. Adjoins a 200-acre WPA with 840 acres of additional permanently protected land within 2 miles. Located in a Prairie Plan Core. |

Pipestone

| Name | TRDS | Acres | OHF Cost | Existing Protection? | Hunting? | Fishing? | Description |
|---------------------|----------|-------|-----------|----------------------|----------|----------|--|
| Pipestone County #3 | 10846201 | 84 | \$165,075 | No | No | No | 79 acres of native grassland assigned a High ranking by MN BS. Adjoins WMA. 1,117 acres of protected land within 2 miles. Located in Hole in the Mountain Prairie Plan core. |

Pope

| Name | TRDS | Acres | OHF Cost | Existing Protection? | Hunting? | Fishing? | Description |
|----------|----------|-------|-----------|----------------------|----------------|----------------|--|
| Pope #11 | 12337226 | 18 | \$24,369 | No | No | No | FWS biologists identified 14.3 acres of native grassland on the property. The entire property is ranked as outstanding by the MN Biological Survey. Adds to 1,900 acre complex of protected lands. Located in a MN Prairie Plan core. |
| Pope #12 | 12339235 | 80 | \$250,863 | No | Not Applicable | Not Applicable | FWS biologists identified 45.69 acres of native grassland on the property. The MN Biological Survey classified this as imperiled Southern Dry Prairie with high biodiversity. In addition, this project would protect 22.06 acres of wetlands, and 1,700' of streamfront on a perennial stream. 490 acres of existing protected land within 1 mile. Located in a MN Prairie Plan corridor. |

Rock

| Name | TRDS | Acres | OHF Cost | Existing Protection? | Hunting? | Fishing? | Description |
|----------------|----------|-------|-----------|----------------------|----------------|----------------|---|
| Rock #9 | 10446220 | 58 | \$250,927 | No | Not Applicable | Not Applicable | 54.9 acres of native prairie ranked as having moderate biodiversity by MN Biological Survey. Includes rare Sioux quartzite outcrops, rock outcrop ephemeral ponds, and documented occurrences of two plant species rare in MN. Parcel is in the center of a ~1,000-acre complex of native prairie. Located in a MN Prairie Plan core. |
| Rock County #2 | 10345218 | 5 | \$58,492 | No | Not Applicable | Not Applicable | Inholding in FWS 930-acre Touch the Sky Prairie. Acquisition will enhance management on this and surrounding lands. Located in Prairie Plan core.. |
