RESIDENTIAL BUILDING PERMITS ISSUED IN THE TWIN CITIES AREA DURING 2003

The housing market remained exceptionally strong in 2003, and building permits in the Twin Cities region rose to their highest annual level since the late 1980s. Permits were up 6.2 percent compared to 2002, virtually hitting the 20,000 units mark. Single-family construction posted an 18 percent gain over last year, with 13,727 units. Multifamily activity, at 6,238 units, was off 13 percent. The multifamily share of total new units, though not as high as in 2002, nevertheless represented a higher share than seen since the late 1980s.

In the nation as a whole, single-family construction was slightly less rapid (up 10 percent), while multifamily construction increased by 3 percent. In terms of overall housing units added, the national increase was slightly higher than in the Twin Cities; 8 percent compared to 6 percent. Among the nation's 25 most populous metropolitan areas, the Minneapolis-St. Paul MSA ranked 7th in its 2003 housing growth rate (per capita basis). Those that grew faster were all sunbelt areas.

The region's central cities of Minneapolis and St. Paul pulled permits for one out of 10 of the region's units, a slightly lower share than last year but strong in the context of the last couple of decades. Minneapolis reported 1,235 units and St. Paul 774. Other leading cities were a distance from the center of the region: Shakopee (1,087 units), Maple Grove (850), Blaine (813), and Lakeville (780).

Rural area housing construction slipped to below 10 percent of the region's total in 2003. The proportion of development occurring in now-developing suburbs (62 percent) and developed suburbs (18 percent) was consistent with trends of the last several years.

The six other Minneapolis-St. Paul MSA counties adjacent to the seven-county area reported 6,115 new housing authorizations in 2003. Their share of the MSA's housing development, which has consistently grown over recent years, held steady this year at 23 percent.

Single-family costs, as measured by the average building permit valuation, tacked on a relatively mild 3.1 percent per unit (\$190,957) over the year. The average multifamily cost hiked up 12.5 percent, to \$110,067 per unit.

**Twin Cities Metropolitan Area
Residential Permits, January-December, 1980-2003**

ABOUT THIS REPORT

This report provides an update of new residential building authorized by cities in the Minneapolis-St. Paul area during 2003. It includes information on the number and location of single-family and multifamily building permits issued, and building permit valuations. The data used in this report was collected by the U.S. Department of Commerce, Bureau of the Census, from local governmental units. Housing permit data for individual cities appear in a table at the end of the report. *Monthly totals shown in the Census Bureau data may not add to the year-to-date figures, since the Census Bureau makes corrections and additions to the data as the year progresses.*

Questions about this information may be directed to Regan Carlson in the Metropolitan Council's Research Office, at (651) 602-1407 or regan.carlson@metc.state.mn.us.

The Metropolitan Council collects additional housing construction data through an annual survey of cities and townships in the Metropolitan Area, which is compared to the reports from the Commerce Department and used to prepare final data. The annual survey also asks for separate reporting of townhouse units, which is not available from the Commerce Department reports.

The Council also publishes information about nonresidential construction activity. Questions can be directed to Metropolitan Council's Data Center at (651) 602-1140 or see www.metrocouncil.org.

DEFINITIONS

Residential activity in this report is measured in terms of **residential units** (housing units). A residential unit is defined as a house or apartment unit intended for occupancy as separate living quarters, having either a kitchen or cooking facilities for the exclusive use of the occupant(s) and direct access from the outside or through a common hall. Residential units do not include group quarters such as institutions, dormitories, hotels, and motels. **Townhouse units are included in the single-family category.**

The Twin Cities **Metropolitan Area**, or Region, includes seven counties under the jurisdiction of the Metropolitan Council: Anoka, Carver, Dakota, Hennepin, Ramsey, Scott and Washington Counties. The Minneapolis-St. Paul **Metropolitan Statistical Area (MSA)** includes the seven metropolitan area counties, plus the adjacent counties of Chisago, Isanti, Sherburne, and Wright Counties in Minnesota and Pierce and St. Croix Counties in Wisconsin. Metropolitan statistical areas are defined by the federal government for the purpose of standardized data collection and analysis.

Building cost refers to the valuation assigned to a building permit at the time the permit is issued. Generally, the building permit valuation is determined by the local governmental official on the basis of average square footage costs for various types of construction, according to Minnesota Administration Department guidelines. Consideration is also given to other factors. It is intended to measure the cost of construction, and in the majority of cases is lower than actual sales price. For instance, **the cost of the lot is typically not included.**
